

NW ICN Template for use in email re CD Death Notification

To: SCN, LN, CSM, Chief Nurse and GM
CC: ICdata team, North West ICT, ICM, ADNIC, Pamela Joannidis and LICD
(also Pauline Hamilton, Kerry Carr and Ann Lang)

Dear All

I write to inform you of a patient in [Ward] , [Hospital], who had CDI has died. As CDI has been cited on the death certificate, a clinical review is required. A DatixWeb report has been generated by the ICT for this event. In line with NHS GGC policy, I have attached a copy of the Clinical Review Tool for completion by the clinical team. Once complete, the data should be inserted into the data fields in the DatixWeb report in Datix electronically.

Please do not hesitate to contact a member of the ICT for further information if required.
