How to clean your reusable eye protection (visor/goggles)

1. **Removal of PPE**
   - Remove gloves and apron
   - Perform hand hygiene after each patient contact
   - Once clinical session complete
   - Remove eye protection and place on trolley
   - Remove mask from behind

2. **Inspection of eye protection**
   - Perform hand hygiene
   - Put on clean apron and gloves
   - Inspect eye protection - if not intact or there is visible contamination with blood/body fluids discard

3. **Cleaning of eye protection**
   - Clean eye protection with detergent wipe then an alcohol wipe. Repeat this cleaning process for the elastic/strap
   - Clean trolley with an alcohol wipe
   - Remove gloves and apron
   - Perform hand hygiene
   - Clean visor to be kept in clear plastic bag

**Remember to write your name in indelible ink on your eye protection**

**Do not touch the front of the mask/eye protection as it is contaminated**
