

## **NEW CHILDREN'S HOSPITAL PROJECT**

### **IN-PATIENT SUBGROUP**

#### Remit

To provide advice to the Clinical Advisory Group regarding the most appropriate configuration of inpatient facilities to reflect best clinical practice in terms of future patterns of service delivery and to do so with particular regard to the hospital's role as a provider of specialist children's services.

#### Key Tasks

- To determine the most appropriate configuration of inpatient service provision taking into account the interactions and synergies between:
  - Generalist and specialist services
  - Individual specialties
  - Medical and Surgical services
  - Acute and elective activity (Note: A and E and short stay provision is being discussed elsewhere)
- To advise on relationships of inpatient areas to other hospital services – critical care, diagnostics, theatre, “front door” etc – based on effective patient flows and resource use.
- To identify key principles that should inform inpatient service planning including:
  - Distribution and mix of single and multiple-bedded accommodation.
  - Provision of inpatient support services and allied facilities eg play, education etc.
  - Pattern of utilisation (5 day/7 day etc)
  - Relationship between inpatient configuration and effective staffing models.
  - Patient/family requirements at ward level

and any other issues that materially affect inpatient arrangements.

#### **Membership of the In-patient Sub-Group**
