

Glasgow & Clyde Weight Management Service Sustaining Service Change

The Issue The Scottish Health Survey (2003) reported that 1 in 5 adults were obese. The 2008 Foresight report estimated that in 2050 more than 50% of adults would be clinically obese.

BMI Range	
3	≥ 35 or ≥ 30 with comorbidities
2	$\geq 25 - 35$
1	$\geq 18.5 - 24.9$

How we addressed the issue
NHSGGC established a pathway of Care from prevention of overweight to the management of morbid obesity, which is evidence based and equitable across Greater Glasgow & Clyde.

Key features

Central Administration & Appointing system
Partnership working and use of existing resources

Key partners

Community dietitians, Local Authorities, Medicine management, GP's, Surgeons and Health Improvement

The Outcomes We Expect

An evidence based, comprehensive and equitable pathway of care across Greater Glasgow & Clyde.

Future Plans
